Machine Learning Consumability in DBMS

Level	Consumability	Description	Target Users	ML Skill Level
1	Algorithm	*Algorithms* available in the underlying DB system as UDFs or SPs	Data scientists, experienced app. developers	High
2	Model	*Predictive models* as first-class object with DDL, DCL, and DML capability	App. developers and DBAs	Medium
3	Process	*Processes* (for model training) as first-class object with DDL, DCL, and DML capability	App. developers and DBAs	Low
4	Automation	*Problem specifications* as first class object with DDL, DCL, ad DML capability	Business specialists, data scientists, app. developers, DBAs	Low
5	Discovery	Capability for the **discovery of ML opportunities** based on data schema and application queries	Business specialists, app. developers, DBAs	Very Low
